

Ultra Pure Creatine Monohydrate

CreaWin is 100% DHT-free ultra-pure creatine monohydrate built for daily-use formulations where quality cannot be compromised. With 99.9% purity, batch-level COA, and GFSI-approved manufacturing, CreaWin delivers the specification consistency and supply reliability that premium brands demand – not just for launch, but for long-term repeat purchase.

Why CreaWin

- ✓ 100% DHT-free: Controlled synthesis completely eliminates this suspected carcinogen found in generic creatine
- ✓ 99.9% purity (HPLC): More active creatine per serving – better value and stronger claims for your brand
- ✓ DCD and creatinine below EFSA limits: Key impurity markers well within regulatory guidelines on every batch
- ✓ GFSI-approved, batch-level COA: Full traceability and documentation for regulatory confidence
- ✓ Heavy metal screened: Tested for lead, arsenic, cadmium, and mercury to meet global safety standards
- ✓ Clean-label ready: Vegan, non-GMO, allergen-free, Kosher and Halal – no formulation barriers

CreaWin Applications

Sports
Powders

Pre-Workout
Blends

RTM
Sachets

Capsules
& Tablets

Ageing

**Zero DHT.
Batch-tested purity.
No compromises.**

- 100% DHT-Free
- 99.9% Purity (HPLC)
- Micronised 200 Mesh
- GFSI-Approved Site
- Batch COA Available
- Vegan & Non-GMO

Purity Matters

Creatine is one of the most validated ingredients in sports nutrition and nutraceutical market – but manufacturing quality varies dramatically. Independent testing shows 44% of generic creatine samples exceed recommended creatinine limits, while 15% exceed DCD thresholds. DHT, a suspected carcinogen formed during poor synthesis, is frequently detected in products that cut corners on process control.

For brands building long-term trust through daily-use products, these aren't abstract quality metrics – they're risks your customers will eventually discover.

CreaWin is produced at a GFSI-approved facility under HACCP principles, with batch-level testing, full traceability, and consistent specification designed for reliable scale-up and long-term supply. Our controlled synthesis eliminates the reaction pathways that produce DHT, delivering 100% DHT-free creatine you can build a brand around. Micronised to 200 mesh for rapid dissolution and neutral sensory profile across powders, capsules, RTMs, and functional blends.
